## How to Clip Video into Segments

- Step 1:** Click [HERE](#) to download **Any Video Converter Ultimate**, run the program.
- Step 2:** Load the video file you want to clip into the software. Simply click the **Add Video File** button that is located in the top left portion of the control panel.
- Step 3:** Select the video you want to trim in the center panel, click **Video Clipping Tool**  under the preview window. To cut flip video length, there are right and left bracket that determine the start and end point of each video clip. Just click the **Start Point**  and **End Point**  to trim your desired section.
- Step 4:** If you need to clip more than one segment, please click **New Segment** button , and repeat the previous steps to trim another segment.
- Step 5:** Click on the trimmed segment, and click **Play Segment** button  to play the selected segment.
- Step 6:** Click the **Move Up** button  and **Move Down** button  to arrange the clipped segments order.
- Step 7:** Click **Apply** to save the changes.
- Step 8:** Click **OK** to return to the main window of the program.

**The main window of clipping video:**

- 1 - **Play/Pause:** used to playback and pause video file.
- 2 - **Play/Pause Segment:** used to playback and pause selected segment.
- 3 - **Stop:** used to stop playing video file.
- 4 - **Previous/Next Mark:** move the play head to previous or next mark point.
- 5 - **Start /Stop Point:** used to start and stop trimming video clip.
- 6 - **New Segment:** allows you to trim more segments.
- 7 - **Mute:** used to turn off the sound for a video currently playing.
- 8 - **Volume Control:** used to control the audio volume level.
- 9 - **Scrubber Bar:** move either a segment or the whole video to anywhere you want.
- 10 - **Segments Pane:** place all the clipped video segments.
- 11 - **Move Up/ Down:** used to move clipped segment up and down.

## How to Crop Video

**Step 1:** Click [HERE](#) to download **Any Video Converter Ultimate**, run the program.

**Step 2:** Load the video file you want to crop into the software. Simply click the **Add Video File** button that is located in the top left portion of the control panel.

**Step 3:** Select the video you want to crop in the center panel, click **Video Crop Tool**

under the previous window, check **Enable Crop** box, set **Crop Area Size** and the **Position of Crop Area** to crop the video, or use the **Crop Tool** in the preview area to visually adjust the dimensions of the cropped area.

**Step 4:** Click **Apply** to save changes.

**Note:** Click **Show Original Video** and **Show Video Cropped** to toggle between original view and cropped view. Click **Restore Defaults** button to restore all the default settings of a video.

## How to Apply Video Effects

**Step 1:** Click [HERE](#) to download **Any Video Converter Ultimate**, run the program.

**Step 2:** Load the video file you want to apply effects into the software. Simply click the **Add Video File** button that is located in the top left portion of the control panel.

**Step 3:** Select the video you want to apply effect in the center panel, click **Video Crop & Effects** button  under the preview window.

**Step 4:** Click **Video Effects** button  to adjust brightness, contrast and saturation by either moving the slider or choosing a value.

**Step 5:** Click **Other Effects** menu, choose **rotate and flip** on the drop-down list.

## How to Merge Several Videos into One File

**Step 1:** Click [HERE](#) to download **Any Video Converter Ultimate**.

**Step 2:** If you want to convert some video clips and merge them into a file, please press the **Ctrl** or **Shift** button to choose the files you need to merge, then **right-click** on them and choose **Merge Output**.

**Step 3:** If you want to cancel the merge operation, please choose the file and click **Unmerge Output**.
